

Opportunity for all AMANAC PROJECTS

An opportunity for AMANAC projects to showcase your project results and small prototype samples via **exhibition booths** to be set up as part of a special pavilion for new products and innovation at:

Ecobuild 2016 (March 8-10, 2016 at the Excel in London, UK.)

<http://www.ecobuild.co.uk/>

- For each project – what will be made available is a **2m x 2m readymade furnished stand** (see picture) for the discounted rate of **£1,250 (a 47% discount)**, plus a marketing fee of £250 (**Total cost: £1500/booth**).

- If interested in registering for a booth for your project, please contact*:

Sanjeev Naik, PhD, TWI, Ltd.
AMANAC-CSA Dissemination Manager
sanjeev.naik@twi.co.uk

* This is important for us to coordinate such that all AMANAC projects have booths in the same area at the exhibition.

The AMANAC-CSA was funded by the Horizon 2020 European Union (EU) Research and Innovation programme to create an effective and long lasting collaboration and coordination platform within all the Advanced Materials and Nanotechnology projects (AMANAC), approved in the frame of the EeB-PPP, whose activities address development of (nano)materials, components and systems for the improvement of the energy efficiency in the built environment.

Visit <http://amanac.eu/> for more details about project news and to learn about our activities and events.
